PROJECTS

AI Python Home Renovation app | *Python, Git, Gemini API*

- Implemented Python's tkinter library to create the front end GUI
- Implemented Google's Gemini 2.0 model to generate responses
- Encrypted API key using env variable
- Used optimized prompts to get exact results each time

Bill Tracking app | *JavaScript, HTML/CSS, Electron.js, Node.js, Git, file system module in node, JSON*

- Used Electron.js and Node.js to use JavaScript outside the browser to develop a desktop application
- Utilized the fs module to read and write data to a JSON file to store data
- Created an application for users to track when their bills are due.
- Made an alert system with the date function to check the current date and the bill due dates to find any unpaid bills due that month

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS, TypeScript

Frameworks: React, Node.js, Electron.js Express.js
